

Reach Conformity Declaration

Reach Conformity Declaration

REACH stands for the Registration, Evaluation, Authorization and Restriction of Chemicals.

REACH (EC 1907/2006) aims to improve the protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances. This is done by the four processes of REACH, namely the registration, evaluation, authorisation and restriction of chemicals. REACH also aims to enhance innovation and competitiveness of the EU chemicals industry.

Roles under REACH

DYCONEX neither manufactures nor trades in chemical substances. As such, we are subject neither to registration requirements nor the obligation to issue safety data sheets.

Printed Circuit Boards are classified as Articles under the REACH regulation 1907/2006/EC. The role of DYCONEX is therefore considered a "downstream user".

Duty of communication

According to REACH, Art. 33, suppliers are obligated to inform DYCONEX immediately, if their delivered products contain any of the [SVHC substances](#) (Substances of Very High Concern) in concentrations higher than 0.1% w/w. For its part, DYCONEX will notify its customers immediately upon receipt of any such information, if the delivered DYCONEX PCBs contain [SVHC substances](#) in concentrations higher than 0.1% w/w.

Even so, DYCONEX is in constant contact with its suppliers. In this regard, it requests obligatory information as to whether or not there have been REACH-relevant changes in connection with the chemical composition of individual raw materials.

Updated information

This declaration is based on our current knowledge as per December 3rd, 2021. For individual information with respect to the products delivered, please contact DYCONEX REACH coordinator under: compliance.dyconex@mst.com.

Please be aware, that DYCONEX has no legal obligation to issue declarations, as long as no SVHC substances are present in our delivered products.

Also, DYCONEX assumes no responsibility for any factors beyond our knowledge and our reasonable control.

The actual list of SVHC substances dated July 8th, 2021 can be found under: www.echa.europa.eu/candidate-list-table

Based in Switzerland, DYCONEX has been in the PCB business for more than 50 years and delivers leading edge interconnect solutions in flex, rigid-flex and rigid technology. DYCONEX core competence lies in the production of highly complex HDI, high-frequency and high-reliability circuit boards for medical, defense, aerospace, industrial and semiconductor applications. DYCONEX is an MST company.
